Program Details

Legislative Citation Elementary and Secondary Education Act, *as amended*, Title IV, Part B.

Program Regulations EDGAR; 34 CFR 76, 77, 80, 82, 85, and 99.

Program Description This program supports the creation of community learning centers that provide academic enrichment opportunities for children, particularly students who attend high-poverty and low-performing schools. The program helps students meet state and local student standards in core academic subjects, such as reading and math; offers students a broad array of enrichment activities that can complement their regular academic programs; and offers literacy and other educational services to the families of participating children.

Types of Projects

Each eligible entity that receives an award from the state may use the funds to carry out a broad array of before- and after-school activities (including those held during summer recess periods) to advance student achievement. These activities include:

- Remedial education activities and academic enrichment learning programs, including those which provide additional assistance to students to allow the students to improve their academic achievement.
- Mathematics and science education activities.
- Arts and music education activities.
- Entrepreneurial education programs.
- Tutoring services, including those provided by senior citizen volunteers, and mentoring programs.
- Programs that provide after-school activities for limited English proficient students and that emphasize language skills and academic achievement.
- Recreational activities.
- Telecommunications and technology education programs.
- Expanded library service hours.
- Programs that promote parental involvement and family literacy.

- Programs that provide assistance to students who have been truant, suspended, or expelled to allow them to improve their academic achievement.
- Drug and violence prevention programs.
- Counseling programs.
- Character education programs.

Program Details

Legislative Citation Elementary and Secondary Education Act, *as amended*, Title I, Part F, and Title V, Part D.

Program Regulations EDGAR

Program Description This program provides formula grants to state education agencies (SEAs) to award competitive grants to local education agencies (LEAs) on behalf of schools. Schools receive awards renewable for up to two additional years of not less than \$50,000 annually to adopt and implement comprehensive school reforms based on scientifically based research and effective practices so that all children can meet challenging state academic content and achievement standards. SEAs are required to give competitive preference to LEAs that plan to use the funds in schools identified as being in need of improvement or corrective action and demonstrate a commitment to help schools implement and sustain reform.

Funds appropriated under Title I are allocated to states on the basis of each state's share of prior-year Title I Basic Grants. In turn, SEAs make competitive subgrants to LEAs for use in schools eligible for Title I funds. Funding provided under the Fund for the Improvement of Education (FIE) is used for additional state allocations based on each state's share of school-age children. SEAs may subgrant their FIE funds to LEAs for use in any public school in the state.

The Department is authorized to reserve up to 1 percent of all CSR funds for the outlying areas and the Bureau of Indian Affairs, up to 1 percent for national evaluation of the program, and up to 3 percent of the amount appropriated for the Title I portion in FY 2002 for quality initiatives.

Types of Projects

All participating schools must use program funds to adopt and implement a comprehensive school reform program that: (1) employs proven methods and strategies based on scientifically based research; (2) integrates a comprehensive design with aligned components; (3) provides high-quality professional development for teachers and staff; (4) includes measurable goals and benchmarks for student achievement; (5) is supported within the school by teachers, administrators, and staff; (6) provides support for teachers, administrators, and staff; (7) provides for meaningful parent and community involvement in planning, implementing, and evaluating school improvement activities; (8) uses high-quality external technical support and assistance from an external partner with experience and expertise in schoolwide reform and improvement; (9) plans for the evaluation of strategies for the implementation of school reforms and for student results achieved annually; (10) identifies resources to support and sustain the school's comprehensive reform effort; and (11) has been found to significantly improve the academic achievement of students or demonstrates strong evidence that it will improve the academic achievement of students.

Program Details

Legislative Citation Elementary and Secondary Education Act *as amended*, Title I, Part B, Subpart 4, P.L. 107-110, 20 U.S.C. 6383.

Program Regulations EDGAR

Program Description The Literacy through School Libraries program helps local education agencies (LEAs) improve reading achievement by providing students with increased access to up-to-date school library materials including well-equipped, technologically advanced school library media centers and professionally certified school library media specialists. LEAs use their funds to: (1) acquire up-to-date school library media resources; (2) acquire and use advanced technology to develop and enhance the information literacy, information retrieval and critical thinking skills of students; (3) facilitate Internet links and other resource-sharing networks; (4) provide professional development for school library media specialists and provide activities that foster increased collaboration between school library media specialists, teachers, and administrators; and (5) provide students with access to school libraries during nonschool hours.

Types of Projects

Ninety-four projects in 33 states were funded in 2002. Approximately 50 percent of the funds are being used to improve collections. The projects are operating in approximately 580 schools serving 236,000 students. Two-thirds of the schools served are at the elementary level, the remaining third are split between middle and high schools. Projects funded in 2002 range from supporting a districtwide library revitalization project in elementary schools in Baltimore, MD; developing a full-service school library in rural Minnewaukan, ND; and implementing a technology-based reading program in Madill, OK.

Districts may use funds for the following allowable activities in 2003:

- Purchase up-to-date books and other school library media resources.
- Acquire and use advanced technology that is integrated into the curricula.
- Facilitate Internet links and other resource-sharing networks.

- Provide professional development for school library media specialists and activities that foster increased collaboration between library specialists, teachers, and administrators.
- Provide students with access to school libraries during nonschool hours, weekends, and summer vacations.

Program Details

Legislative Citation Elementary and Secondary Education Act of 1965, *as amended*, Title V, Part D, Subpart 6, 20 U.S.C. 7253, et seq.

Program Regulations EDGAR

Program Description The purpose of the Javits program is to carry out a coordinated program of scientifically based research, demonstration projects, innovative strategies, and similar activities designed to build and enhance the ability of elementary and secondary schools to meet the special educational needs of gifted and talented students. The major emphasis of the program is on serving students traditionally underrepresented in gifted and talented programs, particularly economically disadvantaged, limited English proficient, and disabled students, to help reduce the serious gap in achievement among certain groups of students at the highest levels of achievement.

Grants are awarded under two priorities. Priority One supports initiatives to develop and “scale-up” models serving students who are underrepresented in gifted and talented programs. Priority Two supports state and local efforts to improve services for gifted and talented students.

Applicants must submit proposals that address one of these priorities and may not combine both priorities in a single application.

For information regarding the national research center, administered by the Institute for Education Sciences (IES), visit: <http://www.gifted.uconn.edu/nrcgt.html>.

Types of Projects

Programs and projects assisted under this section (consisting of research and demonstration grants as well as SEA and LEA capacity-building grants) may include each of the following:

- Conducting scientifically based research on methods and techniques for identifying and teaching gifted and talented students—and for using these programs and methods to serve all students.

- Conducting program evaluations, surveys, and other analyses needed to accomplish the purpose of this program.
- Carrying out professional development for personnel involved in the education of gifted and talented students.
- Establishing and operating model projects and exemplary programs for serving gifted and talented students, including innovative methods of serving students whose needs may not be met by more traditional gifted and talented programs (including summer programs, mentoring, service learning, and programs involving business, industry, and education).
- Implementing innovative strategies, such as cooperative learning, peer tutoring, and service learning.
- Providing technical assistance and information on how to serve gifted and talented students and, where appropriate, how to adapt these programs to serve all students.
- Making materials and services available through state regional educational service centers, institutions of higher education, or other entities.
- Providing funds for challenging, high-level course work, disseminated through technologies (including distance learning), for students in schools that would not otherwise have the resources for such course work.

In addition, the program supports the National Research Center on the Gifted and Talented for the purpose of carrying out the allowable activities already described. Not more than 30 percent of program funds can be spent for research.

Legislative Citation Formerly, Part C of Title II of the Elementary and Secondary Act (ESEA) of 1965, as amended by IASA. The Reading Excellence Act (REA) was enacted on Oct. 21, 1998, by P.L. 105-277, the Omnibus Appropriations Act of FY 1999. It was not reauthorized by the No Child Left Behind Act of 2001.

Program Regulations EDGAR

Program Description In 1998, Congress enacted the Reading Excellence Act as an amendment to Title II of ESEA. The Department made competitive, three-year grants to state education agencies (SEAs) that established a state reading and literacy partnership. SEAs that received funding made two-year subgrants, "local reading improvement grants," on a competitive basis to eligible local education agencies (LEAs). In addition, states awarded at least one "tutorial assistance grant" to LEAs most in need of help.

Types of Projects

The intent of the program was to improve classroom instruction using scientifically based reading research so that all children would be able to read by the end of the third grade. The program provided professional development for teachers and other instructional staff, extended learning and tutorial services, extra assistance for kindergarten students who needed help transitioning into first grade, and family literacy services to improve reading.

Legislative Citation National Assessment of Educational Progress Authorization Act, 20 U.S.C. 9501.

Program Regulations EDGAR

Program Description The National Assessment of Educational Progress (NAEP) is the only nationally representative and continuing assessment of what U.S. students know and can do in a variety of subjects. The NAEP budget supports five major program components:

- National NAEP. These are the main NAEP assessments, which report results for the nation and periodically measure student achievement in civics, geography, reading, mathematics, science, U.S. history, writing, and other subjects.
- Long-term NAEP. These assessments measure student achievement in reading, mathematics, and science over time.
- State NAEP. These assessments provide reliable state-level student achievement data in reading, mathematics, science, and writing.
- Secondary Analysis Grants and Special Studies Program. This program funds an annual user-proposed secondary analysis grants competition as well as periodic special studies to examine methodological and operational issues.
- Evaluation and Validation Studies.

The purpose of the secondary analysis competition is to encourage eligible parties to prepare reports that would not otherwise be available using new ideas and state-of-the-art techniques to analyze and report the information contained in NAEP and NAEP High School Transcript Studies.

Analyses and reports prepared under this program should potentially be useful to the general public, parents, educators, educational researchers, or policymakers. Different types of grant competitions may be held periodically under NAEP. Please check the Department's "Funding Opportunities" Web site at <http://www.ed.gov/funding.html> for detailed information on current competitions.

Types of Projects

Secondary analysis projects include those that use NAEP achievement data alone or in combination with other data sets to assist policymakers and educators who make decisions about curriculum and instruction. Some projects are designed to assist states in analyzing, interpreting, and reporting their state-level NAEP results. Other projects include the development of analytic procedures to improve the precision with which NAEP researchers estimate group and subgroup performance. Some NAEP projects in this program develop improved sampling procedures for national or state-level NAEP evaluations. Other projects analyze and report data using statistical software developed by the project to permit more advanced analytic techniques, which then can readily be applied to the NAEP data. Still other types of projects include the development of innovative ideas to improve NAEP design and to improve sampling and data collection techniques.

Program Details

Legislative Citation Elementary and Secondary Education Act of 1965 *as amended*, Title II, Part C, Subpart 3, 20 U.S.C. 6711-6714.

Program Regulations EDGAR

Program Description We the People enhances student attainment of challenging content standards in civics and government. The program is available to public and private elementary and secondary schools in the 435 congressional districts, the District of Columbia, Puerto Rico, American Samoa, Guam, and the Virgin Islands. The program provides: (1) a course of instruction on the basic principles of our nation's constitutional democracy and the history of the Constitution and the Bill of Rights; (2) noncompetitive simulated congressional hearings following the course of study, which are conducted with community members as judges, for schools that choose to conduct them; and (3) an annual national competition of simulated congressional hearings for secondary students who wish to participate in such a program.

Types of Projects

We the People is comprised of two components: "Project Citizen" and "Citizen and the Constitution." Project Citizen, a program for middle grade students, focuses on the role of state and local governments. Citizen and the Constitution provides teacher training and curriculum materials for upper elementary, middle, and high school students and promotes civic competence and responsibility among students.

This program also funds "Understanding Representative Democracy," a project which promotes knowledge, understanding, and support of Congress and state legislatures.

Program Details

Legislative Citation Rehabilitation Act of 1973, as amended, Title II, 29 U.S.C. 762-764.

Program Regulations EDGAR; 34 CFR 350.

Program Description The primary purpose of NIDRR is to carry out a program of research and related activities designed to maximize the full inclusion, employment, independent living, and economic sufficiency of individuals with disabilities, with particular emphasis on improving the effectiveness of services authorized under the Rehabilitation Act. NIDRR focuses on applied research such as: (1) the transfer of rehabilitation technology to individuals with disabilities; (2) widespread distribution in usable formats of practical scientific and technology information; and (3) identification of effective strategies to enhance opportunities for individuals with disabilities to engage in productive work and live independently.

Types of Projects

NIDRR funds are used to support rehabilitation research, demonstration projects, and related activities, including the training of persons who provide rehabilitation services or who conduct rehabilitation research. In addition, NIDRR supports projects to disseminate and promote the use of information concerning developments in rehabilitation procedures, methods, and devices. NIDRR also supports data analyses of the demographics of individuals with disabilities.

Program Details

Legislative Citation McKinney-Vento Homeless Assistance Act of 1987, *as amended*, Title VII, Subtitle B, 42 U.S.C. 11431-11435.

Program Regulations EDGAR

Program Description Formula grants are made to the 50 states, the District of Columbia, and Puerto Rico based on each state's share of Title I, Part A, funds. The outlying areas and the Bureau of Indian Affairs also receive funds. Among other things, the program supports an office for coordination of the education of homeless children and youths in each state, which gathers comprehensive information about homeless children and youths and the impediments they must overcome to regularly attend school. These grants also help state education agencies ensure that homeless children, including preschoolers and youths, have equal access to free and appropriate public education. States must review and revise laws and practices that impede such equal access. States are required to have an approved plan for addressing problems associated with the enrollment, attendance, and success of homeless children in school. States must make competitive subgrants to local education agencies to facilitate the enrollment, attendance, and success in school of homeless children and youths. This includes addressing problems due to transportation needs, immunization and residency requirements, lack of birth certificates and school records, and guardianship issues.

Types of Projects

With subgrant funds, local education agencies offer such activities as coordination and collaboration with other local agencies to provide comprehensive services to homeless children and youths and their families. Local education agencies also offer expedited evaluations of the needs of homeless children to help them enroll in school, attend regularly, and achieve success.

Program Details

Legislative Citation Elementary and Secondary Education Act of 1965 as amended, Title I, Part D, 20 U.S.C. 6421-6472.

Program Regulations 34 CFR 200

Program Description The Part D, Subpart 1, State Agency Neglected and Delinquent (N and D) Program provides formula grants to state education agencies (SEAs) for supplementary education services to help provide education continuity for children and youths in state-run institutions for juveniles and for youths who are enrolled in education programs in adult correctional institutions, so that these youths can make successful transitions to school or employment once they are released. Funds are allocated by formula to SEAs, which make subgrants to the state agencies responsible for educating neglected or delinquent children and youths. To be eligible for state N and D funds, juvenile institutions must provide 20 hours a week of instruction from nonfederal funds; adult correctional institutions must provide 15 hours.

The Subpart 2 Local Education Agency Program requires each SEA to reserve, from its Title I allocation, funds generated by the number of children in locally operated institutions for delinquent youths. Funds are awarded to LEAs with high proportions of youths in local correctional facilities to support dropout prevention programs for at-risk youths.

Types of Projects

The programs support supplemental instruction in core subject areas such as reading and mathematics, as well as tutoring, counseling, and transition services.

Program Details

Legislative Citation Elementary and Secondary Education Act of 1965, *as amended*, Title I, Part A, 20 U.S.C. 6301-6339, 6571-6578.

Program Regulations 34 CFR 200

Program Description This program provides financial assistance through state education agencies (SEAs) to local education agencies (LEAs) and schools with high numbers or high percentages of poor children to help ensure that all children meet challenging state academic content and student academic achievement standards.

Federal funds are currently allocated through four statutory formulas that are based primarily on census poverty estimates adjusted for the cost of education in each state. Basic Grants provide funds to LEAs in which the number of children counted in the formula is at least 10 and exceeds 2 percent of an LEA's school-age population. Concentration Grants flow to LEAs where the number of formula children exceeds 6,500 or 15 percent of the total school-age population. Targeted Grants are based on the same data used for Basic and Concentration Grants except that the data are weighted so that LEAs with higher numbers or higher percentages of poor children receive

more funds. Targeted Grants flow to LEAs where the number of schoolchildren counted in the formula (without application of the formula weights) is at least 10 and exceeds 5 percent of the LEA's school-age population.

Education Finance Incentive Grants (EFIGs) distribute funds to states based on factors that measure (1) a state's effort to provide financial support for education compared to its relative wealth as measured by its per capita income and (2) the degree to which education expenditures among LEAs within the state are equalized. Once a state's EFIG allocation is determined, funds are allocated (using a weighted count formula that is similar to Targeted Grants) to LEAs in which the number of poor children is at least 10 and at least 5 percent of the LEA's school-age population.

LEAs target the Title I funds they receive to schools with the highest percentages of children from low-income families. Unless a participating school is operating a schoolwide program, the school must focus Title I services on children who are failing, or most at risk of failing, to meet state academic standards. Schools in which poor children make up at least 40 percent of enrollment are eligible to use Title I funds for schoolwide programs that serve all children in the school.

LEAs also must use Title I funds to provide academic enrichment services to poor children enrolled in private schools.

Types of Projects

More than 47,500 public schools across the country use Title I funds to provide additional academic support and learning opportunities to help low-achieving children master challenging curricula and meet state standards in core academic subjects. For example, funds support extra instruction in reading and mathematics, science, and computers, and special preschool, after-school, and summer programs to extend and reinforce the regular school curriculum.

Program Regulations EDGAR; 34 CFR 76.

Program Description This program is designed to improve the education of limited English proficient (LEP) children and youths by helping them learn English and meet challenging state academic content and student academic achievement standards. The program provides enhanced instructional opportunities for immigrant children and youths.

Types of Projects

States must develop annual measurable achievement objectives for LEP students that measure their success in achieving English language proficiency and meeting challenging state academic content and achievement standards. Schools use the funds to implement language instruction educational programs designed to help LEP students achieve these standards. Approaches and methodologies used must be based on scientifically based research. LEAs may develop and implement new language instruction programs, expand or enhance existing programs, implement schoolwide programs within individual schools or systemwide programs to restructure, reform, or upgrade all programs, activities, or operations related to the education of LEP students.

Program Regulations This program is a demonstration program and is operated under the statute and without any regulations.

Program Description The program was created to attract and retain more highly trained individuals in the early childcare profession. Borrowers who meet the criteria for this program can have 20 percent of their total loans forgiven after two years of service. (For any year in which a portion of a loan is forgiven, the proportionate amount of interest on that loan accruing in that year is also forgiven.) An additional 20 percent is forgiven after a borrower completes a third consecutive year of qualifying service; this amount rises to an additional 30 percent after each of the fourth and fifth consecutive years of service.

Who May Apply (specifically)

Undergraduate and vocational students enrolled or accepted for enrollment in participating schools.

Type of Assistance (specifically)

Federal Pell Grants are direct grants awarded through participating institutions to students with financial need who have not received their first bachelor's degree or who are enrolled in certain postbaccalaureate programs that lead to teacher certification or licensure. Participating institutions either credit the Federal Pell Grant funds to the student's school account, pay the student directly (usually by check) or combine these methods. Students must be paid at least once per term (semester, trimester, or quarter); schools that do not use formally defined terms must pay the student at least twice per academic year.

Program Details

Legislative Citation Higher Education Act of 1965, *as amended*, Title IV, Part A, Subpart 1, 20 U.S.C. 1070a.

Program Regulations 34 CFR 690

Program Description The Federal Pell Grant Program provides need-based grants to low-income undergraduate and certain postbaccalaureate students to promote access to postsecondary education. Students may use their grants at any one of approximately 6,000 participating postsecondary institutions. Grant amounts are dependent on the student's expected family contribution (EFC) (see below), the cost of attending the institution, whether the student attends full-time or part-time, and whether the student attends for a full academic year or less. Students may not receive Federal Pell Grant funds from more than one school at a time.

Financial need is determined by the U.S. Department of Education using a standard formula, established by Congress, to evaluate the financial information reported on the Free Application for Federal Student Aid (FAFSA) and to determine the family EFC. The fundamental elements in this standard formula are the student's and, in the case of dependent students, the parents' income and

assets, the family's household size, and the number of family members attending postsecondary institutions. The EFC is the sum of (1) a percentage of net income (remaining income after subtracting allowances for basic living expenses and taxes) and (2) a percentage of net assets (assets remaining after subtracting an asset protection allowance). Different assessment rates and allowances are used for dependent students, independent students without dependents, and independent students with dependents. After filing a FAFSA, the student receives a Student Aid Report (SAR), or the institution receives an Institutional Student Information Record (ISIR) which notifies the student if he or she is eligible for a Federal Pell Grant and provides the student's EFC.

Type of Assistance (specifically)

Perkins Loan allocations are made to eligible institutions for the purpose of providing low-interest loans to needy undergraduate and graduate students attending eligible institutions. Institutional allocations for new Federal Capital Contributions are made to institutional revolving funds based on institutional requests for program funding under a statutory formula. Under the funding formula, funds are distributed to institutions first on the basis of the institution's base guarantee plus the pro rata share received during the 1999-2000 award year under the Perkins Loan Program and then on the basis of the aggregate need of the eligible students in attendance. Institutions must contribute 25 percent of the funding. In addition, institutions receive payments to compensate them for the cost of certain statutory loan cancellation provisions.

Students receive Perkins loans from participating institutions after filing the Free Application for Federal Student Aid (FAFSA) to determine their financial need.

Program Details

Legislative Citation Higher Education Act of 1965, as amended, Title IV, Part E, 20 U. S. C. 1087aa-1087ii.

Program Regulations 34 CFR 674

Program Description The Perkins Loan Program provides low-interest loans to help needy students finance the costs of postsecondary education. Students can receive Perkins loans at any one of approximately 2,000 participating postsecondary institutions. Institutional financial aid administrators at participating institutions have substantial flexibility in determining the amount of Perkins loans to award to students who are enrolled or accepted for enrollment. Borrowers who undertake certain public, military, or teaching service employment are eligible to have all or part of their loans canceled. In general, schools are reimbursed for 100 percent of the principal amount of the loan canceled, and the reimbursement must be reinvested in the school's revolving loan fund. These institutional reimbursements for loan cancellations are an entitlement. In FY 2001, FCC contributions were \$100 million and cancellations were \$60 million; in FY 2002, FCC contributions were \$100 million and cancellations were \$67.5 million; and in FY 2003, FCC contributions were \$99.4 million and cancellations were \$67.1 million.

Loan volume in the program comes from (1) newly appropriated FCC contributions and loan cancellation payments; (2) an institutional matching contribution equaling at least one-third of the FCC contribution; and (3) school-level collections on prior-year student loans.

Financial need is determined by the U.S. Department of Education, using a standard formula, established by Congress, to evaluate the financial information reported by the student on the Free Application for Federal Student Aid (FAFSA). The information from the FAFSA then determines the student's expected family contribution (EFC). The fundamental elements in this standard formula are the student's and, in the case of dependent students, the parents' income and assets, the family's household size, and the number of family members (excluding parents) attending postsecondary institutions. The EFC is the sum of (1) a percentage of net income (remaining income after subtracting allowances for basic living expenses) and (2) a percentage of net assets (assets remaining after subtracting an asset protection allowance). Different assessment rates and allowances are used for dependent students, independent students without dependents, and independent students with dependents. After filing a FAFSA, the student receives a Student Aid Report (SAR), or the institution receives an Institutional Student Information Record (ISIR) that provides the student's EFC.

Program Description The FSEOG Program provides need-based grants to low-income undergraduate students to promote access to postsecondary education. Students can receive these grants at any one of approximately 3,800 participating postsecondary institutions. Institutional financial aid

administrators at participating institutions have substantial flexibility in determining the amount of FSEOG awards to provide students who are enrolled or accepted for enrollment. Priority is given to those students with “exceptional need” (those with the lowest expected family contributions at the institution) and those who are also Federal Pell Grant recipients.

Institutional allocations are based on institutional requests for program funding under a statutory formula. Under the funding formula, funds are distributed to institutions, first, on the basis of the institution's base guarantee plus the pro rata share received during the 1999-2000 award year under the FWS Program and, then, on the basis of the aggregate need of the eligible students in attendance. Employers of FWS recipients must contribute 25 percent of the funding (except in the case of private, for-profit organizations, which must match 50 percent and in the case of established criteria for which the matching requirement is waived).

The Department of Education encourages colleges and universities to use FWS Program funds to promote community service activities. Institutions must use at least 7 percent of their Work-Study allocation to support students working in community service jobs, including reading tutors of pre-school age or elementary school children; mathematics tutors for students enrolled in elementary school through ninth grade; or literacy tutors in a family literacy project performing family literacy activities.

Students receive FWS awards from participating institutions after filing the Free Application for Federal Student Aid (FAFSA) to determine their financial need and may be employed by the institution itself; by a federal, state, or local public agency; by a private nonprofit organization; or by a private for-profit organization.

Note: The appropriations amounts listed provide the federal subsidy costs associated with new Direct Loans for each fiscal year. Under current economic assumptions for the FY 2001, FY 2002, and FY 2003 loan cohorts, the Department anticipates that borrowers' repayments over the life of the loans will exceed the government's borrowing costs. This helps explain the negative amounts shown. However, it is the volume of loans made that is often more relevant to those seeking student aid. Loan volume in FY 2002 was \$20.5 billion and in FY 2003 is estimated to be \$20.2 billion.
